

Taylor'd to recognize. Taylor'd to diagnose. Taylor'd to repair.

GATE HEALTH INSPECTION

Taylor Fence is ready to help you recognize, diagnose and repair issues with gates, gate operators, and access control systems. Our certified technicians are trained to spot problems, provide accurate estimates, and arrange for repairs to be completed on time and within budget.

INSPECTIONS INCLUDE

- » The visit to the job site and a maximum of 2 hours on site
- » Assessment of the gate/barrier arm and automation system
- » Any adjustments and repairs possible without replacement parts
- » A written proposal for any repairs requiring additional parts or equipment
- » A list of work performed along with the invoice
- » A written proposal for any additional work required, including parts and labor

Taylor Fence recommends preventative maintenance every 3-6 months. Annual maintenance contracts are automatically renewed until written notice of cancellation is provided.

PREVENTIVE MAINTENANCE PROGRAM

Taylor Fence can help you avoid costly equipment repairs and potentially increase the longevity of your equipment with a preventive maintenance plan for gates, gate operators, and access control systems.

- » Choose from 90-day, 180-day, or custom services agreements
- » Work done by American Fence Association-certified professionals
 - » CAGOI (Certified Automated Gate Installer) technicians
 - » CAGSD (Certified Automated Gate System Design) estimators

HOW YOUR MAINTENANCE PLAN WORKS

For newly installed automated gates:

- » Taylor Fence contracts to service either annually or semi-annually for a set fee

For an existing automated gate:

- » **Step 1** – Taylor brings the gate operator back to good working condition
- » **Step 2** – Taylor Fence contracts to service either annually or semi-annually for a set fee

If we find anything worn or damaged

- » We will alert you and provide a quote to fix the issue

Included in standard service

- » Clean the gate operator inside and out
- » Lube and fine-tune all moving components
- » Perform manufacturer-recommended maintenance
- » Adjust gate travel limits
- » Inspect control and entrapment-protection devices for proper function
- » Provide written service notice

Taylor Fence maintenance plans can save you work and repair costs while keeping your fence and gate system looking and performing their best year after year. Your Taylor representative can customize the right plan to meet the ongoing needs of your system at a budget that makes sense.

Ask your Taylor representative for a custom maintenance plan estimate today.

NOTICE: Gate operators are potentially hazardous and require entrapment protection devices to help protect pedestrians and vehicles. It is very important to know that all your controls and entrapment protection devices are working correctly.
